

INFORMATION SECURITY MANAGEMENT SYSTEMS

ISO 27001 is a standard that provides a framework for establishing, implementing, maintaining, and continually improving information security management systems (ISMS). The standard is intended to help organisations manage and protect their valuable information assets by implementing a systematic approach to information security. This course aims to provide participants with the knowledge and skills they need to effectively manage information security in their organisations.

LEARNING OUTCOMES

- Know the purpose and importance of information security.
- Gain a detailed understanding of key concepts, standards and techniques required for the effective management of an Information Security Management Systems (ISMS)
- Explain the importance of Information Security Management Systems (ISMS) in an organisation.
- Describe the approaches and guidelines required in the effective management of an Information Security Management Systems (ISMS) in an organisation.
- Explain the dos and don'ts of information security policies and procedures at the workplace.

WHY IS THIS COURSE IMPORTANT ?

Compliance - ISO 27001 certification is often required by clients, partners, and regulatory bodies as a condition of doing business as it demonstrates the organisation's commitment to security and compliance.

Risk management - ISO 27001 enables organisations to identify, assess, and mitigate risks related to information security, hence minimising risk of data breaches, cyber-attacks, and other security incidents.

Competitive advantage - organisations are able to use the ISO 27001 certification as a competitive advantage as it shows that these organisations have taken proactive measures to ensure the security and confidentiality of sensitive data.

Employee awareness - employees are able to understand the importance of information security and their role in protecting sensitive data, hence leading to a culture of security awareness and responsible behaviour.

Continuous improvement - organisations are able to establish a continuous improvement process for information security management, thus ensuring that the organisation stays up to date with the latest threats and best practices in information security.

WHO SHOULD ATTEND?

- Directors, Chief Executive Officers, Chief Financial Officers, General Managers and Heads of departments.
- Business Entrepreneurs, Legal Advisors, Compliance Officers, and Risk Managers. Employees who handle personal data on a regular basis as part of their job functions
